PROJECT AURORA

Written by
Screenplay Division

FADE IN:

SCENE 1: INT. QUANTUM RESEARCH LAB - NIGHT

Emergency red warning lights pulse rhythmically. High-tech server racks flicker with static discharge. Smoke rolls across the reinforced titanium floor.

DR. ELENA VANCE (30s), wearing a torn lab coat with blood-stained cuffs, furiously types commands into a holographic terminal. Her hands tremble over the biometric scanner.

Beside her, the AURORA CORE—a levitating quantum containment sphere—glows with unstable violet plasma.

DR. ELENA VANCE
(into intercom)
Marcus! The containment magnetic field is collapsing! If we don't decouple the quantum drive in ninety seconds, the entire sector vaporizes!

A sudden explosive detonation rocks the laboratory! Sparks shower from overhead conduit pipes. Glass shards shatter across the cleanroom console.

Through the smoke, MARCUS REED (40s), clad in an armored tactical vest and holding a smoking pulse blaster, backs through the breached blast door.

MARCUS REED
We don't have ninety seconds, Elena! Chen's strike team just breached the perimeter! Grab the encryption drive!

Elena snatches a metallic quantum cylinder and slams it into a reinforced briefcase.

SCENE 2: EXT. LAB FACILITY SUB-LEVEL ROOF - NIGHT

Heavy torrential rain lashes against concrete parapets. Thunder rumbles in the pitch-black sky.

Elena and Marcus burst through the emergency roof exit. Below them, floodlights sweep the industrial compound.

A black tactical helicopter hovers overhead, its spotlight pinning them against the drenched brick wall.

AGENT CHEN (40s) steps into view from behind an HVAC housing, aiming an assault rifle equipped with laser scope. Four armored guards flank him with stun batons.

AGENT CHEN
Drop the briefcase, Dr. Vance. The Director requires the Aurora drive intact. You know there is nowhere to run.

MARCUS REED
(whispering to Elena)
When I fire, jump toward the maintenance crane.

Marcus triggers a blinding flash grenade! The helicopter pilot swerves as illumination flares. Gunfire erupts across the rooftop!

Elena sprints through the crossfire and leaps onto an automated service gondola.

SCENE 3: INT. UNDERGROUND METRO TUNNEL - NIGHT

Water drips into deep sewer grates. Distant subway trains rumble through the damp subterranean labyrinth.

Marcus and Elena stumble into an abandoned maintenance alcove. Marcus clutches a bloody wound on his shoulder.

Elena opens her medical first-aid kit, pulls out a sterile syringe and antiseptic spray, and dresses his wound.

MARCUS REED
(grimacing)
Chen has every federal frequency monitored. How long before the Aurora sequence initiates?

Elena retrieves an encrypted tablet from her backpack and connects a data cable to the quantum drive.

DR. ELENA VANCE
Fourteen hours until the singularity stabilizes. If Commander Hayes doesn't rendezvous at the harbor warehouse, the cascade cannot be reversed.

SCENE 4: INT. SYNDICATE COMMAND CENTER - NIGHT

A sterile, glass-walled conference room overlooking the neon skyline. Wall-sized holographic monitors display satellite tracking feeds and biometric heat signatures.

COMMANDER HAYES (50s), sharp tailored suit, watches the surveillance monitors with cold calculation.

Agent Chen enters, drenched from the rain, holding a damaged tracker beacon.

AGENT CHEN
We lost them in the subterranean canal network, Commander. But their biological signatures will surface near the industrial docks.

COMMANDER HAYES
Deploy the tactical drone swarm. Dr. Vance must not reach the harbor alive with that core. Authorize lethal force.

SCENE 5: EXT. INDUSTRIAL HARBOR DOCKS - DAWN

Thick morning fog clings to rows of rusted shipping containers. Gulls circle above brackish water. A lone cargo freighter idles near Pier 9.

Elena, now wearing a hooded trenchcoat, navigates through the maze of cargo containers. She checks a handheld GPS detector.

A sleek black hovercraft cruiser glides silently between the warehouses.

Elena ducks behind a forklift as two armed sentries patrol past with guard dogs.

SCENE 6: INT. PIER 9 WAREHOUSE - DAY

Dust motes drift in shafts of morning sunlight piercing through broken skylights. Rusted machinery and stacked wooden crates cast long shadows.

Elena steps cautiously into the open floor.

DR. ELENA VANCE
Commander Hayes? Are you here?

From the shadows behind a diesel generator, Commander Hayes steps forward, flanked by two bodyguards with suppressed pistols.

COMMANDER HAYES
You did remarkable work, Elena. Hand over the cylinder, and this can end peacefully.

Elena freezes, realizing the betrayal.

DR. ELENA VANCE
You were never planning an extraction. You sold the project to Chen's syndicate.

SCENE 7: EXT. HARBOR PIER - DAY

Marcus arrives in a stolen industrial utility truck, smashing through the chain-link gate!

The truck skids across the wet pier, slamming into Hayes's armored SUV!

A chaotic firefight erupts. Marcus fires from behind the open truck door, providing covering fire for Elena.

MARCUS REED
Elena, get to the boat! Move!

Elena sprints toward the moored tugboat as bullets ricochet off iron bollards.

SCENE 8: INT. TUGBOAT BRIDGE - DAY

Elena slams the steel hatch shut and throws the heavy latch.

She fires up the diesel engines. Gauges shudder to life.

Through the salt-encrusted forward windshield, she sees Agent Chen standing on the pier, raising a shoulder-mounted rocket launcher!

DR. ELENA VANCE
Not today.

She initiates the Aurora quantum pulse. A violet shockwave ripples outward from the cylinder, disabling all electrical circuits on the pier. The rocket launcher fizzles harmlessly.

The tugboat throttles into the open misty channel.

SCENE 9: EXT. COASTAL LIGHTHOUSE - DUSK

An isolated stone lighthouse stands resilient against battering ocean waves. The setting sun casts crimson streaks across the horizon.

Elena and a bandaged Marcus sit on the stone steps overlooking the Pacific. The glowing quantum cylinder rests securely between them, its hum finally quieted to a steady, harmless heartbeat.

MARCUS REED
So what happens now?

DR. ELENA VANCE
Now we rebuild. And we make sure nobody ever weaponizes Aurora again.

FADE OUT.
THE END
